Recreation

The quality of wildlife and recreation opportunities in The Villages continues to grow as fish were stocked or restocked in four ponds within Florida's Friendliest Hometown! The species of fish added were young fingerling Bass and Bluegill, which were provided by an aqua cultural company in North Central Florida. The ponds that received the fish include Ashland, Calumet Grove, Golfview, and Lake Mira Mar.

As a friendly reminder in regards to all fishing accessible ponds in The Villages, please keep the following in mind:

The District practices catch and release. Catch and release is defined as, "a practice within recreational fishing intended as a technique of conservation. After capture, the fish are unhooked and returned to the water before experiencing serious exhaustion or injury." This definition goes hand in hand with our core values.

All fishermen are required to comply with federal, state and local laws, statues and ordinances.

Fishing is permitted in any area that can be reached without crossing over or trespassing on privately owned property, golf courses or areas with "No Public Access" signs posted.

Fishing is prohibited in Lake Sumter, Harmeswood or other areas with "No Fishing" signs posted.

For additional information on fishing in The Villages, please visit our website, www.DistrictGov.org.

Mosquito Bite Protection for Overseas Travelers

FloridaHealth.gov • Florida Department of Health

Mosquitoes spread viruses and parasites that cause diseases like chikungunya, dengue, Zika and malaria. Before you travel to areas where these diseases are found, talk to your health care provider about your health concerns, and ask about malaria prevention medicine.

Mosquitoes can live indoors and will bite at any time, day or night.

Bring Environmental Protection Agency (EPA)-registered insect repellents

When you travel to areas with mosquitoes, bring an EPA-registered insect repellent. Use products with active ingredients that are safe and effective.

- Always follow the product label instructions.
- Do not spray repellent on skin under clothing.
- If you use sunscreen, put sunscreen on first and insect repellent second.
- It is safe for pregnant or nursing women to use EPA-approved repellents if applied according to package label instructions.
- Learn more: www2.epa.gov/insect-repellents.

USE INSECT REPELLENT WITH ONE OF THESE ACTIVE INGREDIENTS

Higher percentages of active ingredient = longer protection

Cover up with clothing

- Wear long-sleeved shirts and long pants.
- Mosquitoes can bite through thin clothing. Treat clothes with permethrin or another EPA-registered insecticide for extra protection.

Use permethrin-treated clothing and gear.

- Permethrin is an insecticide that kills mosquitoes and other insects.
- Buy permethrin-treated clothing and gear (boots, pants, socks, tents), or use permethrin to treat clothing and gear—follow product instructions closely.
- Read product information to find out how long the permethrin will last.
- Do not use permethrin products directly on skin.

Keep mosquitoes out of hotels rooms & other lodging

- Choose a hotel or lodging with air conditioning and screened windows and doors.

If you will be sleeping outside or in a room that is not well screened, buy a bed net BEFORE traveling overseas.

- Buy bed nets from an outdoor store, and choose a WHOPEs-approved bed net (like Pramax*): compact, white, rectangular, with 156 holes per square inch and long enough to tuck under a mattress.
- Permethrin-treated bed nets provide more protection than untreated nets.
- Do not wash bed nets or expose them to sunlight—this will break down permethrin more quickly.
- Learn more: www.cdc.gov/malaria/malaria_worldwide/education/itn.html.
