3 Choose the specific notifications you would like to receive and click 'Sign Up'

4 Check your email and confirm

A screenshot of the DistrictGov.org website's 'Resident Academy' page. The page is divided into several sections with checkboxes for selection. The sections include: 'District & Committee Information and Agendas' (listing various districts and committees), 'Solicitations' (listing construction, janitorial, professional services, general, and landscaping), 'Precautionary Boil Water Notices' (listing Central, North, and Village Center service areas), 'Schedule Updates & Closings' (listing executive golf courses, recreation centers, street, miscellaneous, and sanitation), 'Public Safety' (listing general information), 'Recreation' (listing leagues, senior games, tournaments, lifestyle events, and the enrichment academy), 'Other' (listing district weekly bulletin, test group, message from the district manager, and info), and 'Employment Opportunities' (listing opportunities for village community development districts). At the bottom of the page, there is a 'Sign Up' button circled in green. Three numbered callouts (1, 2, 3) point to the 'Sign up for e-Notifications' button, the registration form, and the 'Sign Up' button respectively. A fourth callout (4) points to an envelope icon.

For additional information: email CustomerService@DistrictGov.org
or call the District Customer Service Center at 352-753-4508
984 Old Mill Run Lake Sumter Landing

Get The Facts:

Pipe Replacement & Infrastructure

FALSE:

Inferior construction materials were used or substandard workmanship took place during road, infrastructure, and facility projects, which are then turned over to the District and become “the residents' problem” to fix.

TRUE:

The Villages is built to a high construction standard. Everything is designed, reviewed, and approved by licensed architects, professional engineers, structural engineers, mechanical engineers, and other professionals. All of the work is built to industry standards, local building codes and is permitted, inspected, and accepted by independent County inspectors who must certify that construction meets industry standards and federal, state and local building codes.

FALSE:

There are massive infrastructure failures, caused by or causing depressions & sinkholes.

TRUE:

Given the sheer massive size, density, and complicated infrastructure within The Villages, along with the topography of Central Florida, it is not uncommon to have naturally forming depressions, and on rare occasions, pipe or other infrastructure failures. The majority of our infrastructure is in excellent condition. Stormwater pipe failures can lead to a depression, and while these do occasionally occur, the majority of depressions are naturally occurring. One of the primary indicators of a stormwater pipe failure is evidence of a depression in the ground immediately above a stormwater pipe. There are several reasons for stormwater pipe failures including age, corrosion, blocked/clogged pipes, separated joints, or connections.

FALSE:

Sinkholes are occurring all over The Villages.

TRUE:

Depressions can and do appear anywhere, and we have been challenged with numerous depressions which have occurred in basins, parking lots, golf courses, and other areas. In every case of a sinkhole, depression, or pipe failure, we utilize Professional Engineers and Geotechnical Engineers to perform analysis including ground-penetrating radar, standard penetration testing, cone penetration tests, core samples, soil density tests, visual inspections, and diver services which formulate our repair efforts.

Get The Facts:

Pipe Replacement & Infrastructure

Most depressions include the use of chemical grout which is injected into numerous injection points to fill and stabilize voids, loose soil, large cavities, etc. We also use clayey soil to backfill and compact into smaller depressions. Depressions within basins are significantly more challenging and thus more expensive to repair and often include repair and/or replacement of the basin liner.

FALSE:

Infrastructure is turned over to the District with no warranty.

TRUE:

All infrastructure turned over to the District from the Developer comes with a one-year (1) warranty. This meets industry standards and is common practice in other cities/counties.

FALSE:

Stormwater pipes and other infrastructure was poorly constructed and now residents just have to pay when it fails.

TRUE:

Infrastructure throughout the community is designed, reviewed, and approved by licensed architects, professional engineers, structural engineers, mechanical engineers, and other professionals. It is built to industry standards, local building codes and is permitted, inspected, and accepted by independent County inspectors who must certify that construction meets industry standards and federal, state and local building codes. District Property Management has a robust program to perform pipe inspections. Pipes are generally inspected every five years for Steel Pipes, and every 10 years for Concrete or PVC pipes. It should be noted that in our older areas of The Villages, our infrastructure is greater than 35 years old and by the sheer age is more prone to failure. Divers are routinely used for wet pipes and pipes with stormwater connective boxes. Stormwater pipe inspections are a proven Best Management Practice (BMP) that can be used proactively to identify potential pipe failures (corrosion, collapse, separation, etc.). By following the adopted BMPs, repairs can be made or other necessary actions can take place to prevent the failure of control measures. Stormwater pipe inspections have led to repair actions, which have prevented the total failure of sections of the stormwater system and avoided hundreds of thousands of potential damages and repair costs.

In The Villages, less than 0.10% (or 1/10th of a percent) of stormwater pipes have actually had a failure.

Get The Facts:

Pipe Replacement & Infrastructure

FALSE:

Nothing is happening after hearing repairs need to be made to certain pipes.

TRUE:

Contractor availability always plays a significant role in the ability of the District to perform and complete Pipe Inspections (and repairs) throughout The Villages. As a result, the Pipe Inspection program has been challenging to keep on schedule and perform required repairs. Likewise, the cost for these services has greatly increased over the past few years which limits the number of inspections that can be reasonably completed within current budgetary constraints. The Village Center Community Development Districts now own a Deep Trekker Remotely Operated Vehicle (ROV) system for DPM to conduct stormwater pipe inspections. With the Deep Trekker, DPM can quickly perform pipe inspections as needed and on the spot without expending District funds on contracted services and save an estimated \$175,000 annually. While DPM will continue to utilize contractors for large-scale pipe inspection projects, the Deep Trekker will prove most critical when we have suspected pipe or stormwater-related failures.

FALSE:

We are just placing a Band-Aid on areas that need repair or replacement.

TRUE:

In most cases, stormwater pipes can be repaired through Cured In Place Pipe, which is a trenchless rehabilitation method used to repair existing pipelines. It is a jointless, seamless lining that can be inserted from the inlet to the outlet, thus there is little to no damage to landscaping and other areas. CIPP is considered to be a 50-year repair and it has proven to be a highly effective solution. In some cases, we must replace a pipe that has failed due to age, corrosion, or other factors. Pipe replacement projects are the last resort. Lastly, we work closely with our City and County partners to cost-share repairs which cross County roads or Right of Ways.

When you read something or hear a rumor while enjoying this wonderful lifestyle, please take a moment to “fact check” before you become concerned or pass along misinformation. In a community this large, misinformation can be one of our biggest challenges. For additional information or clarification, visit DistrictGov.org or contact District Property Management at 352-753-4022.

Calling All Resident Lifestyle Volunteer Leaders!

Don't forget to stop by the At Your Service location that manages your booking to pick up your 2024 Facility Use Permit.

Pet Friendly Guideline

All dogs are required to be on a leash at all times, dogs are not allowed off leash on any athletic field or other public areas, sport courts included. Do not allow pets to play and walk on common area landscaping. Never leave your dog unattended and always keep your attention on your dog.

Swimming Pools

All swimming pools managed by the Recreation & Parks department are heated during the cooler months. We strive for water temperatures between 81-84 degrees. Temperature will fluctuate depending on the weather. When using the swimming pools please follow the Pool Etiquette.

The Recreation & Parks Department strives to make the pools safe for everyone's use and enjoyment!

Inside any pool area, all eligible users are asked to refrain from:

*Please use headphones or earbuds

*Designated smoking areas are outside the pool area

All residents and guests are **REQUIRED** to comply with ID requirements and ages to use the swimming pools and supporting amenities. Infants and toddler flotation devices are allowed with adult supervision.

How can I save money adjusting my irrigation timer?

Turn your irrigation timer off after rainfall events and let your lawn “tell” you when you need to turn the timer back on. If a particular zone begins to show signs of stress, only set the irrigation system to irrigate the stressed zone, don’t run the entire system. Rain sensors should be

checked monthly to ensure that they are not clogged with debris. Your irrigation system settings should also

be checked monthly to be sure that it is operating on the proper day and time and to verify that no “extra” start times are accidentally turned on. Know and follow your watering restrictions and don’t water just because it’s your day!

Know and follow your watering restrictions and don’t water just because it’s your day!

The amount of irrigation needed varies depending on the time of year, rainfall, and soil conditions. Irrigation systems should only be operated when lawns begin showing signs of stress, such as:

- Lingering footprints/mower tracks
- Grass blades or leaf blades begin to close lengthwise
- The top few inches of soil feel dry

Lawn and Landscaping watering is limited to two days per week during the hours of 12 AM–10 AM or 4 PM–12 AM. To find the correct

irrigation schedule for your residence, along with other helpful topics, visit our website at DistrictGov.org and click on the Water Wisdom icon below.

Household Electronics & Hazardous Waste Mobile Collection - Amnesty Day

Saturday, November 4, 2023 — 8 AM to 2 PM

Location: Lake Okahumpka Park, 6085 E SR 44, Wildwood, FL 34785

| What to bring: | | |
|--|--|----------------------------------|
| Automotive fluids and batteries | Herbicides | Propane Tanks (25 lbs) |
| Cleaners | Paint removers and thinners | Solvents |
| Fertilizers | Latex & oil based paints | Smoke detectors |
| Fluorescent lamps and Mercury containing devices | Household electronics (TVs, VCRs, computers, etc.) | Rechargeable household batteries |
| Fungicides | Pesticides | Wood Preservatives |
| Gas (old gas & old gas cans) | Pool Chemicals | |

HOW TO PACKAGE AND TRANSPORT CHEMICALS

| What not to bring: | | |
|-----------------------------|------------|-------------------|
| Biological/Infectious waste | Explosives | Radioactive waste |
| Empty paint cans | Tires | |

1. Do NOT mix chemicals together.
2. Keep products in original labeled containers if possible.
3. Place containers into cardboard boxes to prevent breakage.
4. Place leaky container in clear plastic bag and transport in box with newspaper.
5. Put boxes in trunk or in back of vehicle away from passengers.

For more information, visit their website at <https://sumtercountyfl.gov/1236/Household-Electronics-Hazardous-Waste-Mo>.

General Gate Operation Safety Guidelines

Although The Villages has over 125 gate facilities spread throughout the community, we are not a “gated community”. Our roadways are public roads and access to our community is not restricted. While our gates do not restrict access, they provide the very important functions of safety and traffic control. Gates require all vehicles to stop before entering a neighborhood and slow down before exiting.

Special Situations You May Encounter

INCLEMENT WEATHER

- During heavy rains, Gate Attendants at staffed gates will open the gate for you after your vehicle has come to a complete STOP in front of the gate.

GATE ATTENDANT INSTRUCTION

- In certain situations, the Gate Attendant may raise the gate and instruct more than one vehicle at a time to pass through. This is done solely at the discretion of the Gate Attendant to prevent specific traffic flow problems.

INOPERATIVE GATES

- Look for traffic cones or STOP barricades placed in front of the inoperative gate(s). Please STOP and proceed with caution. If you come upon a gate that is not functioning correctly, please notify Community Watch so that repairs can be scheduled as quickly as possible.

24-Hour Dispatch: 352-753-0550

CAMERAS

- All gates are equipped with cameras, allowing Community Watch to continually record and monitor traffic entering and exiting the community.

Gate Operation Guidelines

The following notice is posted at all entry and exit gates:

Please slow to the posted speed limit of 5-mph when entering a gate area.

RESIDENT LANES

- Resident entrance gates are raised by either the use of your gate access card or by pressing a button on the box where the card reader is located.
- When using your gate access card, please STOP at the card reader and display your card within 12-inches of the card reader.
- When pressing the button, please STOP at the card reader box and press the button.
- When the gate opens, proceed carefully, watching for all cross traffic, cyclists, golf cars and pedestrians.

VISITOR LANES

- Visitor entrance gates are raised by either the use of your gate access card, by pressing a button on the box where the card reader is located or manually by a gate attendant.
- If you are using a gate access card, please STOP at the card reader and display your card within 12-inches of the card reader.
- If you are pressing the button, please STOP at the card reader box and press the button.
- If you approach a gate with a gate attendant, please STOP and allow the gate attendant to fully open the gate before proceeding.

EXIT GATES

- Proceed slowly towards the gate to allow the sensor to recognize your vehicle and the gate to open.
- When the gate opens, proceed carefully, watching for all cross traffic, cyclists, golf cars and pedestrians.
- Only one vehicle at a time should pass through the gate. A second vehicle trying to pass through a raised gate will be damaged by the closing gate.
- When the gate opens, proceed carefully, watching for all cross traffic, cyclists, golf cars and pedestrians.

Maintenance Work & Other Closures

Throughout the Community

Lake Sumter Landing Seal And Stripe Work

Updated 9/21/2023

District Property Management is conducting seal and stripe work in several Lake Sumter Landing parking lots. [Click here](#) to view a map of the affected areas. This schedule may be adjusted due to unforeseen circumstances, including weather.

Lake Sumter Landing Parking Lot Seal and Stripe Schedule:

- Chiller Building, Phase #12: TBA
-

Walking Trail Closure

The Lake Sumter Landing Wilkerson Creek Walking Trail will be closed for replacement from the Covered Bridge behind Barnes and Noble to Old Camp Road for 3 weeks beginning on September 18, 2023.

Road Closure

District Property Management will be performing restoration for a stormwater pipe that will require a closure of the westbound golf car lane on Bichara Boulevard northwest of the intersection of US 441 and Bichara Blvd near Wendy's. Golf cars will be merged temporarily into automobile traffic before returning to the golf car lane.

The closure will begin Friday, October 6, 2023 and will continue indefinitely until stormwater restoration is completed as soon as possible. Please pay attention to the flow of traffic and use caution when approaching the lane merge. If you have any questions, please call District Property Management at 352-753-4022.

IRRIGATION SYSTEM FLUSHING: DISTRICTS 5-8

In April 2023, our Utilities Operations and Maintenance contractor (Jacobs) began flushing the Villages Water Conservation Authority (VWCA) irrigation system located in Districts 5-8. Flushing prevents the accumulation of small particles and build-up, which can lead to plugging issues in our irrigation system. Due to the size of the VWCA system, the area has been divided into 90 distinct flushing zones. Once started, this project will take approximately 50 weeks to work through all 90 zones.

As the flushing takes place, you will see the Jacobs team opening fire hydrants and flushing irrigation lines only into the roadway. Work hours will be from 8 am to 5 pm. Information will be updated regularly on the District's website on when you can expect to see the Jacobs team in action in your area. Please continue to check the Weekly Bulletin or the [What's Happening](#) page on [DistrictGov.org](#) for updates.

This maintenance work will not have any effects on your drinking water quality nor pressure. This is a proactive effort to maintain your irrigation system.

The safety of residents and contractor personnel is of the utmost importance. We are requesting everyone to abide by all barricades and warning signs and to avoid the active work area for anything other than access to your property.

Thank you for your cooperation and patience as we improve our irrigation system. If you have any questions or would like additional information, please contact District Utilities at 352-753-4022.

See below for the schedule and map. Please note that the schedule and zone are tentative based on operational conditions encountered.

[Click Here To View a Map of the Flushing Zones](#)

A tentative schedule of the areas impacted in the upcoming week:

| Zone Flushed | Duration | Start | Finish |
|--------------|----------|-------------------|-------------------|
| 48 | 3 days | Friday 10/27/23 | Tuesday 10/31/23 |
| 51 | 1 day | Wednesday 11/1/23 | Wednesday 11/1/23 |
| 54 | 2 days | Thursday 11/2/23 | Friday 11/3/23 |
